POLISHING A LEATHER SHOE

To polish a shoe one needs the following:

i. Rag
ii. Polishing brush
iii. Applicator brush
iv. Polish

To begin polishing your shoes, first use a rag to clean the shoe, then use the applicator brushes to collect the polish and then apply on the shoe continuously until the shoe is totally covered with polish; allow the shoe for some time. Finally use a polishing brush to finish the shoe into a fine shiny article.
